TOPIC -----

Is it still possible to get a replacement for bad Logo disks?

DISCUSSION -----

Yes. Logo Computer Systems, Inc. still supports Logo purchasers with replacement disks as needed. There is a charge for replacement, and you must send them the damaged disk.

If you call the Montreal number, and don't understand French, the electronic message will switch over to English if you wait a while.

Search the Tech Info Library for a separate article that gives the phone number and address for Logo Computer Systems, Inc.
