AFE: Works-to-Works Date Problem Corrected

===

This article last reviewed: 25 May 1988

The "Works-to-Works" translator converts an AppleWorks database to a
Microsoft Works database. However, early versions of the "Works-to-Works"
translator, working with Apple File Exchange, did not convert dates
properly. January dates and partial dates (such as Jan 3 88 or Apr 88) are
scrambled, while other dates lose a month in the process.

The newest version of the Works-to-Works translator converts dates
correctly. To verify that you are using the latest version, check the Get
Info of the translator while in the Finder. The dates should be:

```
   Created:   Jun 24, 1987  11:01AM
   Modified:  Jan 29, 1988   6:35PM
```
