TOPIC ---

How can I print to my HP printer from AppleWorks?

DISCUSSION --

In configuring Apple IIe to an H.P. Laserjet Printer, you will need the
following equipment:

  1. H.P. Laserjet Printer
  2. Apple Super Serial Card
  3. Male to Female Standard RS-232C Cable

Set the dip switches on the Super Serial Card as follows:

```
  SW1:        1 2 3 4 5 6 7       SW2:        1 2 3 4 5 6 7
       ON         X   X X              ON  X      X X
       OFF  X X X   X                  OFF   X X     X X
            1 2 3 4 5 6 7                   1 2 3 4 5 6 7
```

From AppleWorks main menu, choose:

  5. Other Activities
  7. Specify Information on your Printer
  2. Add a Printer
  11. Custom Printer

Specify the slot from which the printer will be accessed, and then make the
following further specifications:

  1. Needs line feed: YES

  2. Accepts top of page: YES

```
   3. Stop at end of page: NO

   4. Platen width: 8

   5. Printer codes:

         a. Characters per inch (CPI)
               CPI    Code
            1. 10     Escape (s10H
            2. 12     Escape (s12H
            3. 15     Escape (s15H
            4. 17     Escape (s17H

         b. Lines per inch (LPI)
               LPI    Code
            1. 6      Escape &l6D
            2. 8      Escape &l8D

         c. Underlining: Choose 'Printer has start/stop underline commands'
               --Begin: Escape &dD
               --End: Escape &d@

         d. Boldface
               --Begin: Escape (s3B
               --End: Escape (s0B

         e. Subscript
               --Begin: Escape &a+25V
               --End: Escape &a-25V

         f. Superscript
               --Begin: Escape &a-25V
               --End: Escape &a+25V
```
