DOS 3.3: Nonstop catalog

Revised: 11/20/84
Security: Everyone

DOS 3.3: Nonstop catalog

===

The Catalog command stops every 18 lines, allowing you to read the
information on the screen before continuing. Vary this pause by changing
three bytes in memory. In a 48K Apple:

```
        poke 44601,234
        poke 44602,234
        poke 44603,234
```
