Apple Writer II: DOS Version--Printing With Parallel Printers

==

Apple Writer may not work properly with some parallel interface
cards. Often the interface requires a CTRL-I sequence if it is to print
wider than 40 columns. This is easy in Apple Writer II. All you need to do is
insert the

         <CTRL-V><CTRL-I><CTRL-V> 132N

at the start of each file. You will have to use the CTRL-V before and
after the CTRL-I to enter it into the file. Please refer to page 51 of the
Apple Writer manual for more details.
