

How to Install Cribbage King / Gin King on your Apple IIGS Computer

Requirements. *Cribbage King / Gin King* runs on all Apple IIGS computers using System 4.0 or later.

Floppy Disk Users. No special installation procedure is necessary when running from the floppy disk. You should, however, make a backup copy of your original disk before running the program. Consult the documentation that came with your computer for information on how to make a backup copy. To run *Cribbage King* or *Gin King*, start your IIGS as you normally would using System 4.0 or later. Place the *Cribbage King / Gin King* disk into any drive. Icons for *Cribbage King* and *Gin King* will appear. Double-click on the appropriate icon.

Hard Disk Users. *Cribbage King / Gin King* may be installed on a hard disk by following these instructions:

- ◆ Insert the *Cribbage King / Gin King* disk.
- ◆ Create a new folder on your hard disk by selecting New Folder from the File menu.
- ◆ Drag the *Cribbage King* and *Gin King* icons from the desktop to the new folder.
- ◆ Open the *Cribbage King / Gin King* disk.
- ◆ Select all of the files on the floppy disk by choosing Select All from the menu.
- ◆ Drag the selected files to the new folder on the hard disk.

Cribbage King / Gin King uses no disk-based copy protection. You will, however, need the *Cribbage King Users Manual* handy when running the programs. Consult the *Cribbage King Users Manual* or the *Gin King Users Manual* for more information on using the programs.
