

### Apple IIGS

#### #59: Do Not Create Zero-Length Text Scraps

Revised by: Dave Lyons

January 1991

Written by: Dave Lyons

July 1989

This Technical Note described a problem with zero-length text scraps.

**Changed since July 1989:** This Note is obsolete beginning with System Software 5.0.3. There is no longer a problem with creating a text scrap of length zero.

---

In System Software 5.0.3 and later, `LEFromScrap` no longer trashes memory if you create a text scrap (scrap type 0) with length zero.
