Apple II: Function of Start 13

=====

Article Created: 8 April 1991

TOPIC -----

I have an Apple IIc Plus with a 5.25-inch drive. Do I need a file called Start 13 on my system for the drive to work properly?

DISCUSSION -----

The file Start 13 was used early on when the Apple II went to a 16-sector disk format. Start 13 made it possible for older, 13-sector diskettes to be read. You don't need it for the Apple IIc to work with current diskettes.
